MissionMaker games-authoring software from the multi-educational-award winning Immersive Education

MissionMaker allows the user to create professional quality, 3D computer games using an extensive object library of backgrounds, props, characters, special effects, audio and video. Simple to learn, the software develops higher order thinking skills and creativity. in an enjoyable and engaging way.

## What you can do ...

Create **amazing game worlds** by combining a range of sophisticated rooms.

Drag tiles to the grid then click to turn into a **fully 3D environment** to be explored. Add **props**, **active props** and **audio** to personalise the fantasy world.

Write **rules** to make your world interactive and begin to understand the basics of programming.

Add **3D Characters** and attach **actions** ... say, watch, go to, follow, teleport to ...

Add **media** - **audio**, **pop ups**, **speech** and **video**. Use the media set in the software or import/record your own.

Combine the simple building blocks to create professional-looking games to impress friends.

## What users have said:

'I enjoyed the MissionMaker project as it was great fun, interesting and worthwhile, and I personally learnt a lot more about the way computers work and how to make my own professional game. I loved the many different worlds, people, objects and this helped me make my work more exciting. Thank you!'

'I thought MissionMaker was great ... good for game designing and you were just like a real designer.'

'Amazing!!! Best fun I've had all year!!!!'

'I enjoyed MissionMaker very much. It is easy to use, simple yet exhilarating. I also think MissionMaker is an excellent way of encouraging pupils to enjoy ICT.'

'MissionMaker is a fun game whether you like aliens or fairy tales – it's amazing. I loved playing this game because you could make games just the way you wanted them with lots of twists and turns. It is the best thing I have done in ICT.'

*Year 8 Students, Gosforth Central Middle School  
Newcastle*

"Every day was a new succes. We had only three hours to make games with the MissionMaker, but all students managed to make a game and they got an USB to take the game home with them. It was delightfull to see how everybody worked with joy and eager - it was very difficult for their teachers to make the students close down the program at the end of the day. This project really demonstrated the importance to integrate the students skills from their spare time in the school teaching."

*Ella Myhring, Teacher Skolekom Denmark*

Once the game has been built export to a Play Mission and anyone can play. Just download the free MissionPlayer.

For games, a free player and training videos, go to:

Black Bull Lane, Fencott, Oxon OX5 2RD

If it's this much fun in school,  
how much more fun will it  
be at home ... ?  
... and it's learning too!

Great for collaborative working ....

Encourages problem solving

Fosters creativity
