

kar2ouche®

An engaging multi-media authoring tool

Enabling virtual role-play, storyboarding, animation and the creation of publications Kar2ouche encourages every child to communicate understanding in the way most appropriate to their abilities.

An open-ended tool, Kar2ouche provides both a blank canvas for individual expression and activities that relate to school subjects.

Motivating children of all abilities, Kar2ouche not only helps them develop skills relevant to particular subject areas, it also facilitates the development of more generic thinking skills. Thus children are encouraged to know how and why as well as what.

Using Kar2ouche students can be encouraged to:

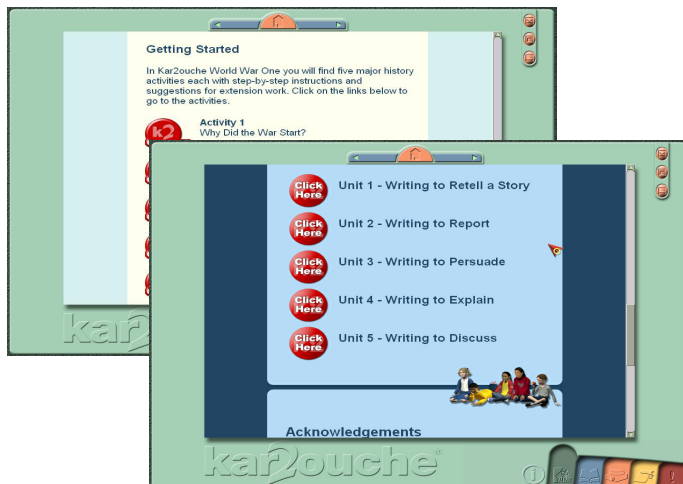

- read for meaning
- sort the relevant from the irrelevant and extract what is essential
- sequence events, organise and prioritise ideas
- make informed choices
- consider alternative perspectives, interpretations and allusion
- observe events and predict subsequent action
- consider consequences
- explore how ideas, values and emotions are portrayed
- create original multi-media texts
- add imagined scenes and events
- consider how meanings alter when texts are adapted to different media
- reflect critically on text, their own work and the work of peers
- listen, understand and respond critically.

Detail about all the titles available:
www.immersiveeducation.eu/kar2ouche

Once students have learned to use Kar2ouche, they are able to use it across a range of subjects. The interface and functions are the same for each title, it is just the backgrounds, characters, props and texts that change.

Ready to use activities subjects across the curriculum and key stages
