

Creative Toolkit *Primary*

What is Kar2ouche?

Kar2ouche is a multimedia authoring tool, and is used in a series of titles focused on enhancing learning in a number of different ways and subjects. In each instance the application's functions and interface are the same; however the backgrounds, characters, props and texts change. Consequently, once children have learned to use Kar2ouche they are able to use it across a range of subjects.

Not only does Kar2ouche help students develop the skills relevant to particular subject areas, it also facilitates the development of more generic thinking skills. Thus students are encouraged to know *how* as well as *what*.

Information Processing Skills

- identify key images, text, ideas – extract what is essential
- sort the relevant from the irrelevant
- organise and where necessary prioritise ideas
- sequence events
- compare and contrast their work with the work of others
- analyse the relationships between characters
- develop cultural awareness.

Reasoning Skills

- justify decisions using evidence
- make informed choices
- work out subtexts
- consider alternative perspectives/interpretations
- articulate ideas.

Enquiry Skills

- work collaboratively to question text
- observe events and predict subsequent action
- consider consequences
- reflect critically on their own work and the work of peers.

Creative Thinking Skills

- offer interpretations of texts/situations
- create multimedia texts
- respond imaginatively to texts/situations.

Evaluation Skills (Assessment for Learning)

- engage in collaborative working and dialogue
- review, modify and evaluate work produced.

Communication Skills

- engage in group discussion
- present ideas to a group
- use visual aids and images to enhance communication
- listen, understand and respond critically to others
- read for meaning:
 - extract meaning beyond the literal
 - analyse and discuss alternative interpretations
 - explore how ideas, values & emotions are portrayed
 - consider how meanings are changed by different media.

Kar2ouche Creative Toolkit helps you deliver the *Harnessing Technology Strategy* by providing engaging, high-quality, multi-media content that is linked to the curriculum and flexible enough to enable effective personalisation. Learners are given a range of communication tools that promote creativity and understanding across the curriculum whilst encouraging collaboration and peer evaluation.

Use your **Harnessing Technology Grant** to invest in software that really makes a difference.
